ok then I don't do anything better I don't want to go over everything I'm messing
ahhahahah

by chance do you know why I can't do the screen share on discord ?? my application
always crashes

Thanks

about discord is a well know problem

you can tag [tomnic79](#) which has found a different way to solve this problem

It is a way similar @adobe way (it is a similar problem AMD user have with some apps)

take look here:
