ok so this is my problem, OC doesnt boot at all, so i setup the UEFI boot in bios and choose the OC boot file, but OC doesnt boot i just get a black screen, it doesnt even load to the OC screen, i am on the latest BIOS and OC its just not loading for me, i tried seting it up on a partition formated fat32, and i also tried puting it on the EFI partition and the USB EFI aswell, but i always get black screen and not loading for me.
