

OC DELL Latitude E6420

Beitrag von „macwindows“ vom 19. Januar 2022, 20:26

Hello Mo-6420.

I need help.

I am trying to install monterey 12.01. The usb installer boots fine (with one of your Clover EFI folder) and can come to setup/installation steps. However the installation hangs (as per attached picture) after copying all files.

Any suggestion/help please.
