

OC DELL Latitude E6420

Beitrag von „griven“ vom 21. Januar 2022, 20:39

@nacwindows consider not to use an outdated SMBIOS since that's what's the shown Error Message is all about. Your picture in post 217 also imply that you use a pirated version of macOS downloaded somewhere from the internet so please do not ask for help on that stuff since it is against our Board-rules. Use a legit installer instead or go ahead an ask the guy's you downloaded that stuff from for support on their pirated product...
