

OpenCore Sammelthread (Hilfe und Diskussion)

Beitrag von „hackmac004“ vom 11. Februar 2022, 09:30

Mit dem neuesten commit kann man Trim wieder ausschalten bei Platten die das nicht unterstützen, wenn man SetApfsTrimTimeout auf 0 stellt.

ChangeLog.md
7 7  -- -5.6 -> 5.8 @ OpenCore ChangeLog
5 5  - Added "--restore-macosop" flag to AudioDxe, making v8.7.7 fix for Windows sound opt-in
6 6  - Added new method to disable trim when "SetApfsTrimTimeout" is set to zero
7 7  - Fixed "SetApfsTrimTimeout" on macOS 12 (only works when set to zero)
```

Funktioniert wunderbar.

```
kernel: (apfs) spaceman_scan_free_blocks:3171: disk4 scan took 0.000000 s (no trims)
kernel: (apfs) spaceman_scan_free_blocks:3153: disk4 scan took 0.000000 s, trims took 0.000000 s
```
