

# "Der neue Weg" macOS zu nutzen oder "The new way of building a Hackintosh"

**Beitrag von „fabiosun“ vom 12. Februar 2022, 12:20**

She passes the menu so quickly that in the end the lady is almost tender in her way of doing things

Personally I would just like to point out that neither I nor Nick Sherlock have invented anything

For sure there have always been methods for virtualization and only by reading the wikis of the various linux systems is it possible to create an installation for your system

I seeing her stuff and above all that after the OpenCore devs had given a coup de grace to my hope of making my sTRX4 system work, I decided to apply myself with ProXmoX and publish the way in which I had managed to make the system go

Then I also enjoyed joking a bit about it by contesting her slogan "hackintosh fast ever" or by asking her some questions to which she seldom answered

see for example a simple internal audio problem on the system that advertised perfect ... ah she replied that she only used DP / hdmi audio ...;)

However, it is even more fun, more than seeing her smoky videos, reading the ecstatic comments of her followers ....

It makes you lose your hopes on humanity 😊 (joking)
