

Legacy BIOS Problem with disk.

Beitrag von „v1ta“ vom 18. Februar 2022, 18:07

Hello! Trying to install 10.11.6. The flash drive started up for the first time, the installation went through. After installation for the second time, there is no bootable hard drive in the clover. I tried to insert a HDD into sata Intel (not Marvell), it did not work.
