

# I Need Help Lenovo C740

Beitrag von „hanykamal“ vom 8. März 2022, 09:00

[griven](#) I downloaded Catalina from Apple store then I used this terminal to create the USB

Code

1. `sudo /Applications/Install\ macOS\ Catalina.app/Contents/Resources/createinstallmedia --volume /Volumes/MyVolume`

[Bob-Schmu](#) I tired GitHub EFI but it's stuck on the Apple logo while I'm installing it.
