[fabiosun](#) I don't quite understand what you mean. I wasn't refering to 12.3 issues. Just noticed the leaked OpenCL Geekbench score of the Ultra is in a similar range of the 6900 XT. Since it is not Metal performance we can only do a rough comparison (also Geekbench is anyway a bad benchmark for that).

Btw, you don't need to full quote the post directly above, a simple reference will also do 😊
