Ne scheint unter Catalina zu laufen, Hmm

Ja Versuch mal ein anderes os... Gab zumindest auch mal Probleme mit der Graka von MSI

dortania.github.io

- RX 5700 XT
- RX 5700 XT 50th Anniversary Edition

Radeon Pro:

- Radeon Pro W5500
- Radeon Pro W5700

Note: Most Navi cards currently require the boot argument `agdpmod=pikera` to get proper display out.

Needed kexts:

- [Lilu.kext](#)
- [WhateverGreen.kext](#)

Important note for MSI Navi users:

- Catalina (10.15) installers and under currently have a VBIOS bug which crashes installers if an MSI Navi card is present. This can be resolved by injecting `ATY,Rom#` in your GPU's DeviceProperties with any value. See here for more details: [Installer not working with 5700XT #901](#)

- MSI's Polaris and Vega line are not affected
