do you have this kext?

AppleMCEReporterDisabler.kext declared and loaded?

AMD patches are still working! 😊

Yes, I have.

For me AppleSMC or the NVME is crashing. AMD CPU is loading fine, if I read the crash correctly.

I tried without NVMEfix now, but same problem. 12.3.1 fine / 12.4beta/RC/xxx crash on first boot in installer.
