

Resize boot logo after upgrade

Beitrag von „Macko“ vom 18. Mai 2022, 14:43

After updating to Mac Monterey 12.4. a large apple logo will appear on the Mac mini M1 when you turn on your PC and boot. It looks awful.

The previous version was OK.

It looks like a low-resolution boot. Does anyone have a similar experience with this and can it be changed ?

Thanks for the advice.
