

Nvidia Web Drivers running on macOS Monterey!

Beitrag von „fabiosun“ vom 30. Mai 2022, 16:48

unless I make a huge mistake ...

It has always been possible to use Nvidia's Web Drivers for systems above High Sierra patching simply a plist file

With Big sur and Monterey was more complex due to the seal and permits

I have always installed the drivers when I had the Nvidia Titan XP and the support I got was for full resolution in multimonitor (even with 4 monitors connected), but no hardware acceleration as neither metal nor cuda were available ...
