

macOS 13 VENTURA beta

Beitrag von „fabiosun“ vom 8. Juni 2022, 18:15

[Zitat von Download-Fritz](#)

rom the reports I heard, this is actually false, as AMD users tend to use borked configs with AvoidRuntimeDefrag off

With this quirk on I can't install Ventura (or boot after installation in Ventura)

It is ON and working with previous OSX version without problem
