

# macOS 13 VENTURA beta

Beitrag von „Phoenix85“ vom 12. Juni 2022, 11:43

[Zitat von fabiosun](#)

without leaf7 patch Ventura cannot start (on AMD CPU)

you can only install but in latest part of installation before login or language choice if it is a fresh installation

Hi,

added it via OCAT now. And now retrying to get it to work. Will post an update soon.

Thanks so far for your help.
