Navi 21 series

Highest Supported OS: Current/Monterey (12)

Initial Supported OS: Big Sur (11.4)

As of 11.4, Apple has added Navi 21 support!

Supported Cards:

- RX 6800
- RX 6800 XT
- RX 6900 XT
 - The XTXH variant (Device ID: `0x73AF`) is supported with WhateverGreen 1.5.2 and spoofing `device-id` to `0x73AE` .

Note: Some Navi 21 cards currently require the boot argument `agdpmo=pikera` to get a display out.

Needed kexts:

- [Lilu.kext](#)
- [WhateverGreen.kext](#)
