

Opencore Installation auf Z690 Gaming X DDR4

Beitrag von „kaneske“ vom 5. Juli 2022, 13:42

No big Deal, just use OCAT and be aware of the change in UEFI Drivers for [SIP](#) and so...

A Walk in the Park, you've got an Hackintosh, this should be Base knowledge.

If you're running into issues open an thread separately for us to help you.

Keep in Mind: always Update you BL on an Stick first to be sure it works flawlessly. If it's ensured, that this stick works and your System ist up without issues you can transfer it to you ESP.

Good Luck
