

Anfrage zu HWC: DELL XPS 13 9343

Beitrag von „cornholioism“ vom 5. Juli 2022, 22:23

Halo,

entschuldigung fur english.

about : [Dell XPS 13 9343](#)

Hello, sorry for disturb you with my problem. I am new on hackintosh and i need help.

I have same xps as you but with different cpu and wifi. My config is i7 5500/8ram/1800p touch and wlan is dw1820.

i have madded bootlable usb with oc 080 with your efi files + added monterey recovery (from dortania).

My problem is, that i am unable to boot into recovery...i can select it, but after selection is my screen black - only with backlight...and after approx 5mins my laptop reboots 😞 Can you tell me , if i7 is too much different that causes black screen? i have tried to remove wlan, but problem still.

...or maybe test full os install image ?

Do you have idea?

thank you

Tomas
