

macOS 13 VENTURA beta

Beitrag von „fabiosun“ vom 7. Juli 2022, 16:05

for amd users

it works with latest commit posted by DF

do not use amd power gadget kext (if you have magic symbol error in loop)

Here i have had also a bootloop with nvram error, solved with the same EFI booting from another disk

As side note Beta 2 propose an update of 1,3 Gb for b3 and 700 Mb for xcode command tools

In a disk it fails when it has to restart and download again a full installer and then fail in different way

Another disk (same kind) and the same EFI download fine 1.3 Gb upgrade and xcode..and update as usual in 3 steps!
