

Photoshop cc2019

Beitrag von „fabiosun“ vom 16. Juli 2022, 15:48

I am sorry to crosspost a forum, but today all app that were painfull for AMD CPU users work as a charm with a click 😊

Waves Plugin, Adobe suite Maya , Krisp, Matlab, PyTorch, Luminar Neo, Wolfram Mathematica and so on which use MKL Intel library

for more information use this two links :

<https://www.macos86.it/topic/5...hackintosh-compatibility/>

and this script for a one click solution :

<https://www.macos86.it/topic/5...r-library-patching-needs/>

edit photoshop und liquify option!
