Opencore sierra recovery bootet aber installation startet nicht

Beitrag von „OSX-Einsteiger“ vom 24. Juli 2022, 10:54

Wegen der Sprache das hier eintragen String **de-DE:3**

The screenshot shows a portion of the OpenCore bootloader configuration file. The configuration is in a key-value format. A yellow arrow points to the 'lang:de-DE:3' entry, which is highlighted in blue in the original image.

```
lang:de-DE:3
```
