

Ryzen 5 5600x und RX 6900 xt

Beitrag von „tackerJim“ vom 1. August 2022, 13:46

For me it is in this case ok to use the BigSure.

I use my PC for Gaming in Windows. To switch my Board is for me now not a option.

After my Holiday I will test to "old" Bios. And tell here how it works.
