Hi,

I am not sure but I think you mean your NVME SSD cause in German Laufwerk is your CD/DVD/Blueray Drive.

I searched a bit and found out that your SSD ist Not 100% Supported, you can add NVMEfixup.kext and hope that it's Work.if not you need to buy another SSD for your system.you can answer in Englisch 90% of the Germans speak Englisch because it is a duty in the school.
