

# Windows startet von OpenCore Boot Menü nicht

Beitrag von „fabiosun“ vom 16. August 2022, 19:08

a simple try could be to disable SSDT you have in use and try to see if Windows starts via OpenCore boot menu

if so you have to adjust your SSDT with a code like this one:

Code

```
1. {  
2. If (_OSI ("Darwin"))  
3. {  
4. Return (Zero)  
5. }  
6. Else  
7. {  
8. Return (0x0F)  
9. }  
10. }
```
