Thanks Moji123 for sharing the EFI. I've only got around to testing it. GPU problems are at least solved by this and I will use at least part of it to do a Monterey build. If successful, I will share that.

hi tommy, sorry i only speak english, did the efi work with the monterrey build, i have the same laptop except its has an i5 8365U and only 8Gb LPDDR3 of ram, trying to install monterey too
