

macOS 13 VENTURA beta

Beitrag von „fabiosun“ vom 19. August 2022, 18:10

[Zitat von spacepilot3000](#)

aber beim AMD traue ich mich nach dem letzten Debakel vor Monterey nicht so recht.
OC und Kexte hab ich auf Stand alle....

As [Hecatomb](#) said AMD CPU works perfectly with macOS Ventura beta 5

I see in your signature you use an old OpenCore boot loader (080)

You have to update it and also all your kext

You have also to check if you have in your Kernel/Patches config.plist section latest release of them (in Ventura you have to insert an old patch named **algrey - _cpuid_set_generic_info - Disable check to allow leaf7 - 13.0**
