

macOS 13 VENTURA beta

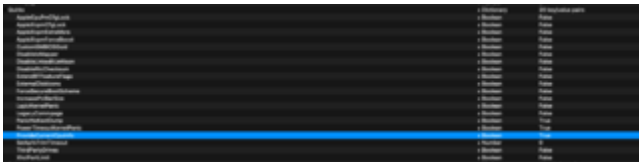

Beitrag von „spacepilot3000“ vom 24. August 2022, 16:30

[Zitat von fabiosun](#)

could you post your EFI?

it seems you miss a new quirk

ProvvideCurrentCpuInfo (you have to enable it)

is enabled. thats wired.

tried also:

AvoidRuntimeDefrag Quirk Disabled-lilubetaall bootarg
