

macOS 13 VENTURA beta

Beitrag von „spacepilot3000“ vom 24. August 2022, 19:36

Thank you.

I added the patch MaxKernel now in all patches, added your new/old patch, and changed the Quirks. I get over the EXITBS message now, but after running the update 10-20 sec I run in a blackscreen/reboot loop. It is too fast to see.

Monterey is still booting fine, and I also updated the AMD Powergadged and kexts...
