

OCAT Validierung findet immer wieder die selben Fehler - obwohl geändert!

Beitrag von „fabiosun“ vom 25. August 2022, 15:19

[Zitat von flaneurin](#)

ist aktuell

from your OCAT about it seems not updated

Are you sure you do not have more disk with different OCAT version

If not your OCAT database is misconfigured

Downloaded your EFI and it is perfect with OCAT validator if I set 083 as OpenCore bootloader
