You should not use a map of usb created for other user

Try disable usb kext (if you have it) and see if you see your keyboard and mouse (with usb cable)

If you use Bluetooth mouse/keyboard maybe you have to map properly your usb

Let see inside USBPort.kext in use:

IOProviderClass	String	AppleUSBXHCIPCI
> IOProviderMergeProperties	Dictionary	5 key/value pairs
model	String	MacPro7,1
- MacPro7,1-XHC0	Dictionary	3 key/value pairs

OSBundleRequired	String	Root

original user mapped in this way based in his system use (ports used or BT)

Your is (could be ) different

For this reason you have no Mouse or keyboard [avus90](#)
