Ryzen 9 Hackintosh?

Beitrag von „RobinWantsMAC" vom 20. September 2022, 18:14

Hey fabiosun, I Use Adobe Software, Festo didact (pneumatic software), Microsoft PowerPoint/OneNote/Word, some Gaming(Steam), etc.

I don't know if I want to put so much time/effort and energy into making a hackintosh that still doesn't work perfectly after a lot of work... probably a $2000 iMac/mini with Boot Camp Windows installed on it would be more satisfying, but not by far as powerful as a mackintosh...
