

AQ-107C unter macOS Monterey 12.3

Beitrag von „kaneske“ vom 20. September 2022, 22:46

the patch only gets the Drivers for the Card loaded and recognized that correctly by the OS, since it has an different ID than Apple implemented in their Drivers, a bit more...I don't know.

But the issue to get the working after loading the Driver for these Cards is an other: working VTD.
