

Ivy-Bridge Installation {gelöst auf ivy-bridge installation {noch OC 0..6.9}}

Beitrag von „mutterhunt“ vom 28. September 2022, 18:27

ok, I think I found the installer log at /private/var/log/install.log (txt), but I'm not able to find the breaking point. It installs fine on this machine but on the first setup boot, it stops with kernel desaster, the foto was good luck,, normally it just hungs up with lotta memory addresses and reboots.
