

Bild & USB Hub über USB-C Port der Grafikkarte?

Beitrag von „hackmac004“ vom 30. September 2022, 23:13

With this one it looks the same as with the one before.

I figured that the whole things works under Catalina without any kext or ssdt. I just checked again and there the external hdd is found, but is also slow. Pretty much the same behavior as in Monterey with kext.

Here ist the ioreg from Catalina, if it is of any help.
