

Kext Updater Problem- und Ideenthread

Beitrag von „edifant“ vom 1. Oktober 2022, 15:55

Hallo, bei mir kackt es auch ab. Monterey geklont und Beta9 aufgebügelt.

AnyMacOS funktioniert.

```
csr-active-config <67080000>
```

```
edi@Lvd002X299Ventura ~ % csrutil status
```

```
System Integrity Protection status: unknown (Custom Configuration).
```

Configuration:

Apple Internal: disabled

Kext Signing: disabled

Filesystem Protections: disabled

Debugging Restrictions: disabled

DTrace Restrictions: disabled

NVRAM Protections: disabled

BaseSystem Verification: enabled

This is an unsupported configuration, likely to break in the future and leave your machine in an unknown state.
