

[SUCCESS] Ryzentosh 5900X 580RX B550A [Big Sur ✓, Monterey - IN PROGRESS]

Beitrag von „fabiosun“ vom 13. Oktober 2022, 11:23

For Ethernet compatibility I would buy a gigabyte b550 board with a Realtek Ethernet (2,5 gb working with rtlucy kext)

I would search in this forum, some users have that board like and it seems it works well in Ventura

Asrock x570 could work but I have no recently test done and it has an intel i211at Ethernet that in my trx40 rig does not work
