Was für ein Preset benutzt Du denn im Heaven? Je nach Einstellung schwanken die Ergebnisse ja naturgemäß stark.

Als Beispiel mal meine Ergebnisse, einmal mit Medium und einmal mit Extreme Einstellung.

```
Detecting the best combination of performance settings:
running the test data set on up to 16 CPU cores and on up to 1 GPU

CPU Model: Intel(R) Core(TM) i9-9900KF CPU @ 3.60GHz
GPU 1: AMD Radeon RX 6900 XT (Metal): 16384 MB total, using up to 100%
