

Ventura startet nicht mehr

Beitrag von „fmt-println-mko“ vom 17. November 2022, 10:51

habe die kext gelöscht und den Eintrag aus der config entfernt,

er bleibt leider an der gleichen Stelle hängen 😞

[Bob-Schmu](#)

ich habe die Änderungen gemacht und auch diese bringen keine Veränderung.

Einzig wenn ich dann jetzt nach einiger Zeit den USB Stick abziehe, nachdem nichts passiert. taucht diese Meldung auf.

Also irgendwie ist er noch da, aber irgendwie gehts nicht weiter.
