

Ryzentosh - Ryzen 5 3600 - ASUS PRIME B450M-K II - AMD 6600 XT (Er Startet nicht)

Beitrag von „fabiosun“ vom 19. November 2022, 14:50

[Ninjiopl](#) we have tried many "working" EFI for system pretty similar to yours

every time an EFI does not start it is useful to see where it hangs

Are you sure that your motherboard bios is well configured?
