

High Sierra Vanilla klappt nicht (Clover)

Beitrag von „Noisezone“ vom 12. Dezember 2022, 12:48

SyntaxError: invalid syntax 🤔

Also versuche gerade mit OC nen Bootstick zu erstellen....

Brauch den Legacy Bootloader auf den Stick...und der will dafür die OpenCore.pgk haben, baut er aber nicht weil:

build.py...

: error 7000: Failed to execute command

```
make                tbuild                [/Users/mini/Downloads/OpenCorePkg-  
master/UDK/Build/OpenCorePkg/DEBUG_XCODE5/X64/OpenCorePkg/Library/OcDebugLibSerial/OcDebugLibSe
```

build.py...

: error 7000: Failed to execute command

```
make                tbuild                [/Users/mini/Downloads/OpenCorePkg-  
master/UDK/Build/OpenCorePkg/DEBUG_XCODE5/X64/OpenCorePkg/Library/OcGuardLib/OcGuardLib]
```

build.py...

```

build.py...

: error F002: Failed to build module

/Users/mini/Downloads/OpenCorePkg-master/UDK/OpenCorePkg/Library/OcDebugLibSerial/OcDebugLibSerial.inf [X64, XCODE5, DEBUG]

Unter 0.8.7:

You probably forgot to build DuetPkg first.
