`Erledigt` AQUANTIA 10 Gigabit Lan Port "Tot"

Beitrag von „alecxx" vom 21. Dezember 2022, 14:41

Ciao Fabio,

I thought the Caseyj patches were usable starting with Monterey, I'm stuck with Big sur (waiting for my 6900Xt coming in tomorrow) as I'm on a Gt710. Can I use those patches as well?

I can run a Aqc107 connected via Thunderbolt (Akition Tb3 Hub) just fine, without loading anything...that´s what i can't explain: even spoofing the device id of the Aqc107 I haven't been able to run the Aqc113cs so far.

In the PCI tree i can see the card but it doesn't even show up in the device listing in System Report.

thanks for your support.

PS Ho visto che hai OCAT con supporto ad OpenCore 0.86, dove lo hai preso? pensavo le release si fermassero allo 0.78....grazie mille! Ale
