AQUANTIA 10 Gigabit Lan Port "Tot"

Beitrag von „fabiosun“ vom 21. Dezember 2022, 14:50

I start from latest question (OCAT)

Also 087 is supported

Download latest OCAT version then select latest release and choose get opencore

About aquantia

Till big sur my Aquantia (107) worked well with available old patches (before the quirk I mean)

From Monterey and greater the quirk never worked

Then CaseySJ has found a solution:

[here](#) the infos

I am installing big sur (latest) to see if Aquantia works also there in my system (if it needs of aquantia patches, we have to try with a different MinKernel for Big Sur)
