

# Boot Apple Recovery bleibt immer an einer Stelle stehn

Beitrag von „BUSTER“ vom 25. Januar 2023, 08:46

Versuch mal folgendes,

csrutil authenticated-root disable

csrutil disable

Überprüfe die Einstellung in dein EFI Section NVRAM --> csr-active-config was steht da?

hier noch ein paar Beispiele --> <https://dortania.github.io/Ope...issues.html#disabling-sip>

00000000 - [SIP](#) completely enabled (0x0).

03000000 - Disable kext signing (0x1) and filesystem protections (0x2).

FF030000 - Disable all flags in macOS High Sierra (opens new window) (0x3ff).

FF070000 - Disable all flags in macOS Mojave (opens new window) and in macOS Catalina (opens new window) (0x7ff) as Apple introduced a value for executable policy.

FF0F0000 - Disable all flags in macOS Big Sur (0xffff) which has another new flag for authenticated root

(opens new window).
