Pay Attention:

This EFI is calibrate perfectly for system summarised above!

Also identical system may have the need of some adjustment (MMIO whitelist section)

I use with this EFI different OS like Big Sur, Monterey and macOS Ventura in their latest also beta revision

I can't describe anything that does not work here (Sleep,wake and so on are perfect)

I use this rig daily with Black Magic Davinci Resolve and Adobe Suite (ME,AE,PR,PS)
