

AMD Radeon 6650 XT, 6950 XT und 6900 XTXH ohne GPU-ID Spoofing

Beitrag von „utopia“ vom 7. April 2023, 16:36

EDIT:

Based on your suggestion, I recreated a new USBX SSDT using SSDTIME and it managed to remove the USBX paths from Windows, but the OpenCL scores are still the same

EDIT2:

I managed to fix the issue by enabling Shanees's patch in (Kernel/patches):

https://github.com/AMD-OSX/AMD_Vanilla

the new scores match the specs: <https://browser.geekbench.com/v6/compute/298388>
