

# MSI X99A GAMING PRO CARBON - Ventura

Beitrag von „Tastenheld“ vom 21. April 2023, 12:16

[F11](#) Please don't quote the whole conversation just tag me via @ following my username

Send me a Video via private message when you use the new EFI folder, which I send you in a couple of minutes.

IMPORTANT always replace the whole folder of the EFI not only parts of it.

EDIT:

As I can see from the boot log, it is not my EFI folder that was used.

Bootargs and such are completely different....

So I currently see no need to make any changes as long as my EFI is not really used.
