

Dell 7537 Big Sur 11.7.6 OC ohne Sound

Beitrag von „cyber“ vom 10. Mai 2023, 16:42

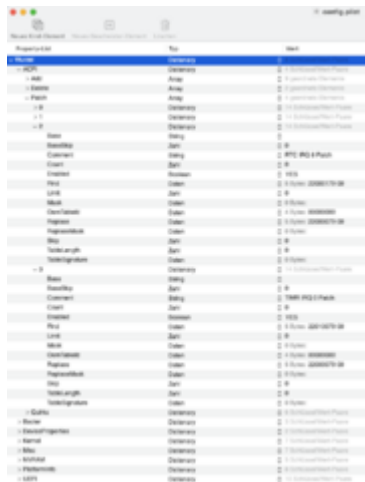

[Zitat von MacPeet](#)

Wenn man Neuling ist, dann muss man halt noch intensiver Suchen und Lesen. Etwas Eigeninitiative kann auch zum Ziel führen.

DSDT kann man auf verschiedene Wege auslesen, welche man für SSDTTime braucht, um die IRQ-Fixes und HPET auszulesen. Steht alles im Netz.

Generell kann man für vieles den eigenen Browser befragen. Eine kurze Eingabe "github oc dell 7537" bringt mich sofort zu einer EFI, wo diese Dinge bereits enthalten sind.

Dort wird dann die layout-ID 88 verwendet, zeigt aber auch, dass der dell 7537 wohl alc283 hat und nicht alc255. Somit sind vermutlich die Angaben in Post#1 nicht richtig.

Hi

EFi ausgetauscht, System neu aufgespielt !

Ton ist endlich da, aber dafür kein Wlan mehr !
