

wenig lustiger Teufelskreis...

Beitrag von „hackmac004“ vom 23. Mai 2023, 01:00

Wenn du bei UEFI/APFS/ mindate und minversion eine -1 einträgst, dann siehst du auch deine Mojave Platte.

Erklärung dafür steht im Handbuch:

```
5. mindate
Type: plist integer
Path: /
Description: Minimal allowed APFS driver date.
The APFS driver date connects the APFS driver with the calendar release date. Apple ultimately drops support for older macOS releases and APFS drivers from such releases may contain vulnerabilities that can be used to compromise a computer if such drivers are used after support ends. This option permits restricting APFS drivers to current macOS versions.
• 0 -- requires the default supported release date of APFS in OpenCore. The default release date will increase with time and thus this setting is recommended. (Currently set to 2021/01/01.)
• -1 -- permit any release date to load (strongly discouraged).
• Other -- use custom minimal APFS release date, e.g. 2020/04/01. APFS release dates can be found in OpenCore boot log and ScApfsLib.

6. minversion
Type: plist integer
Path: /
Description: Minimal allowed APFS driver version.
The APFS driver version connects the APFS driver with the macOS release. Apple ultimately drops support for older macOS releases and APFS drivers from such releases may contain vulnerabilities that can be used to compromise a computer if such drivers are used after support ends. This option permits restricting APFS drivers to current macOS versions.
• 0 -- requires the default supported version of APFS in OpenCore. The default version will increase with time and thus this setting is recommended. (Currently set to allow macOS Big Sur and newer [1800000000000000].)
• -1 -- permit any version to load (strongly discouraged).
• Other -- use custom minimal APFS version, e.g. 1412091001000000 from macOS Catalina 10.15.4. APFS versions can be found in OpenCore boot log and ScApfsLib.
```

Das du da ein Win11 siehst, könnte gut daran liegen, dass du bei Misc/Entries irgend einen Pfad zu Win eingetragen hast, den es gar nicht gibt. Löscht du den raus, wird auch nix mehr angezeigt.
