

Hilfe bei: Hackintosh auf AMD System installieren

Beitrag von „fabiosun“ vom 10. Juni 2023, 15:50

[pegxa](#) could you post EFI you are using by now?

Magic symbol error means an old kext used in EFI (not good for Ventura)

use the attached one

also a new SMCAMDProcessor kext just be updated if you are using it

your motherboard (MSI AMD Board)needs a bit of more effort to boot OSX from Monterey to Sonoma OS

but you can install all system you like
