

Dell Vostro 3558 mit OpenCore & macOS Ventura

Beitrag von „darthwilson“ vom 15. Juni 2023, 20:19

Nothing worry. In my case, it is also a team to practice and test mac. In the end I got down to work with monterey by having a more native support, see if I can get everything to work.

When I get experience, I'll try "ventura". Also thanks for the information. 🐜
